

... the successful completion of the new headquarters for RT HEALTH, SURRY HILLS

In 2008, CPS was appointed Project Manager to deliver the refurbishment and extension of 1-9 Buckingham Street for the new head office of RT Health. RT Health is a not-for-profit specialist health fund which provides health care services to workers in the public transport sector.

RT Health's plan was to relocate their head office from Burwood, and to create member facilities, such as dental and optical services, at the new premises in Surry Hills. The existing two storey building plus basement was fully refurbished, inclusive of BCA upgrade and the construction of two additional levels onto the building including a spacious roof balcony.
